

OBJECTIVE

HOW TO WIN

Be the **first to complete all 10 Phases** in order. If multiple players finish Phase 10 in the same hand, **lowest cumulative score wins**. On a score tie, those players replay Phase 10 — first to go out wins.

TURN SEQUENCE

1

Draw one card

From the draw pile or the top card of the discard pile.

2

Optionally lay down your Phase

Only if your hand contains the complete Phase. You earn Phase credit the moment you lay it — you don't need to win the hand.

3

Optionally hit onto any laid-down Phase

Only allowed after your own Phase is already down. You may hit onto any player's Phase, as long as the card legally extends it.

4

Discard one card to end your turn

The last card in your hand must be discarded — it cannot be used as a hit — to go out.

THE 10 PHASES

#	REQUIREMENT
1	2 sets of 3
2	1 set of 3 + 1 run of 4
3	1 set of 4 + 1 run of 4
4	1 run of 7
5	1 run of 8
6	1 run of 9
7	2 sets of 4
8	7 cards of 1 color
9	1 set of 5 + 1 set of 2
10	1 set of 5 + 1 set of 3

Phases must be completed **in strict order** (1 → 10). Completing a higher Phase does not grant credit for skipped ones. Players advance independently — you and your opponents can be on different Phases at the same time.

DEFINITIONS

Set	Two or more cards with the same number. Any color combination is allowed.
Run	Four or more cards in consecutive numerical order. Any color combination is allowed.
Color	Cards all sharing the same color. Numerical order does not matter.

SCORING

Points are scored **against** players for cards remaining in hand when someone goes out. The round winner always scores 0. Lowest cumulative score wins.

Cards numbered 1–9	5 pts
Cards numbered 10–12	10 pts
Skip cards	15 pts
Wild cards	25 pts

Cards already laid down as part of a Phase — or hit onto another player's Phase — are **not** counted toward your penalty.

Wild Wild Card

25 pts if in hand

Substitutes for any number or color.

A Phase must contain at least one natural numbered card. Wilds cannot compose 100% of a Phase.

Once placed in a laid-down Phase, a Wild is **locked** — it cannot be moved or replaced.

If the dealer's first discard is a Wild, the first player may pick it up normally.

Skip Skip Card

15 pts if in hand

Causes the target player to lose their next turn.

Cannot be picked up from the discard pile — ever.

Cannot be used as part of a Phase.

Only one Skip may target the same player per round. Additional Skips aimed at an already-skipped player are discarded without effect.

If the dealer's first discard is a Skip, the first player's turn is automatically skipped.

Sandbagging: A player may legally hold a completed Phase without laying it down immediately — this is a valid strategy. The app cannot and does not prevent it.

Discard pickup: If you pick up the top card of the discard pile, you must keep it for the rest of that turn — you cannot immediately discard the same card.

Empty draw pile: Shuffle the discard pile (excluding the top card) to form a new draw pile.

Exceeding Phase minimums: You may lay down more than the minimum cards for a Phase only if the extras can be directly appended to an existing group. You cannot add an unrelated third group to Phase 1 (which requires exactly 2 sets).

Phase skipping: Even if you lay down a run of 9 while on Phase 4 (run of 7), it counts only for Phase 4 — no credit toward Phase 5 or 6.

Fixed 10 Hands

All players advance to the next Phase each hand regardless of whether they completed it. After 10 hands, lowest total score wins. Eliminates the "stuck on a Phase" mechanic entirely.

Shortened Game

Agree on a target number of Phases before starting (e.g., 5 or 7). First player to complete that many Phases wins. All other rules remain the same — great for shorter sessions.

Even Phases Only

Players complete only Phases 2, 4, 6, 8, and 10 — five Phases total. All other rules remain the same.
